

Inventory Optimization for Multi-Store Jewellery Retailers

5 Inventory Mistakes Jewellery Retailers Must Avoid

1. Overstocking Slow-Moving Designs	Blocks capital and limits flexibility.
2. Running Out of Bestsellers	Leads to lost revenue and poor customer experience.
3. No Data-Driven Planning	Decisions lack consistency and accuracy.
4. Poor Multi-Store Visibility	Creates imbalance across stores.
5. Ignoring Aging Inventory	Dead stock silently reduces margins.

How Gulmohars Helps

Gulmohars helps jewellery retailers optimize inventory across stores, reduce dead stock, and improve availability of high-demand designs.
